Project Design Phase-II
Technology Stack (Architecture & Stack)

Date	20 November 2022
Team ID	PNT2022TMID43644
Project Name	SMARTFARMER – IoT ENABLED SMART FARMING APPLICATION
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

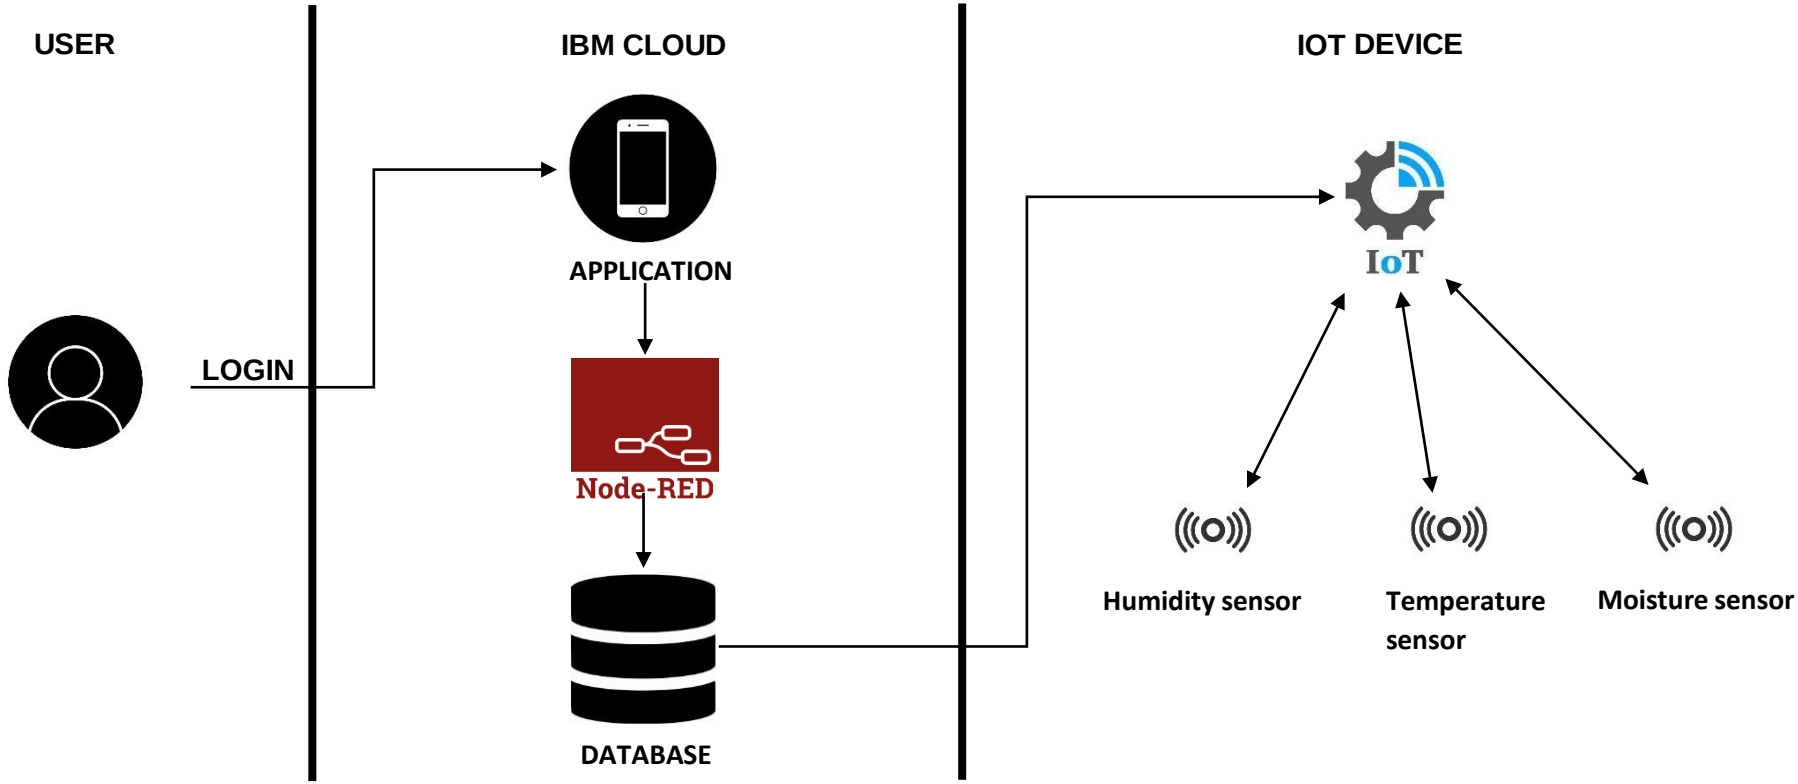

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	User Interface	How user interacts with application e.g. Web UI, Mobile App, Chatbot etc.	HTML, CSS, JavaScript / Angular Js / React Js etc.
2.	Application Logic-1	Logic for a process in the application	Java / Python
3.	Application Logic-2	Logic for a process in the application	IBM Watson STT service
4.	Application Logic-3	Logic for a process in the application	IBM Watson Assistant
5.	Database	Data Type, Configurations etc.	MySQL, NoSQL, etc.
6.	Cloud Database	Database to store the data fetch by sensors connected with IoT device.	IBM DB2, IBM Cloudant etc.
7.	File Storage	The user can store the data in any format	IBM Block Storage or Other Storage Service or Local Filesystem
8.	External API-1	Because of farming land it will be need to monitoring weather, so the weather API are used.	IBM Weather API.
9.	Machine Learning Model	It is necessary to monitor and identify the disease infection.	Object Recognition Model.
10.	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud Local Server Configuration: Cloud Server Configuration :	Local, Cloud Foundry, Kubernetes, etc.

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	Node red, MIT App	Connecting Web UI and Applications
2.	Security Implementations	List all the security / access controls implemented, use of firewalls etc.	e.g. SHA-256, Encryptions, IAM Controls, OWASP etc.
3.	Scalable Architecture	Justify the scalability of architecture (3 – tier, Micro-services)	Technology used
4.	Availability	Justify the availability of application (e.g. use of load balancers, distributed servers etc.)	Technology used
5.	Performance	Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc.	Technology used
